Mobility services gain vehicles

Forecast of new vehicle sales distribution in urban areas in the United States

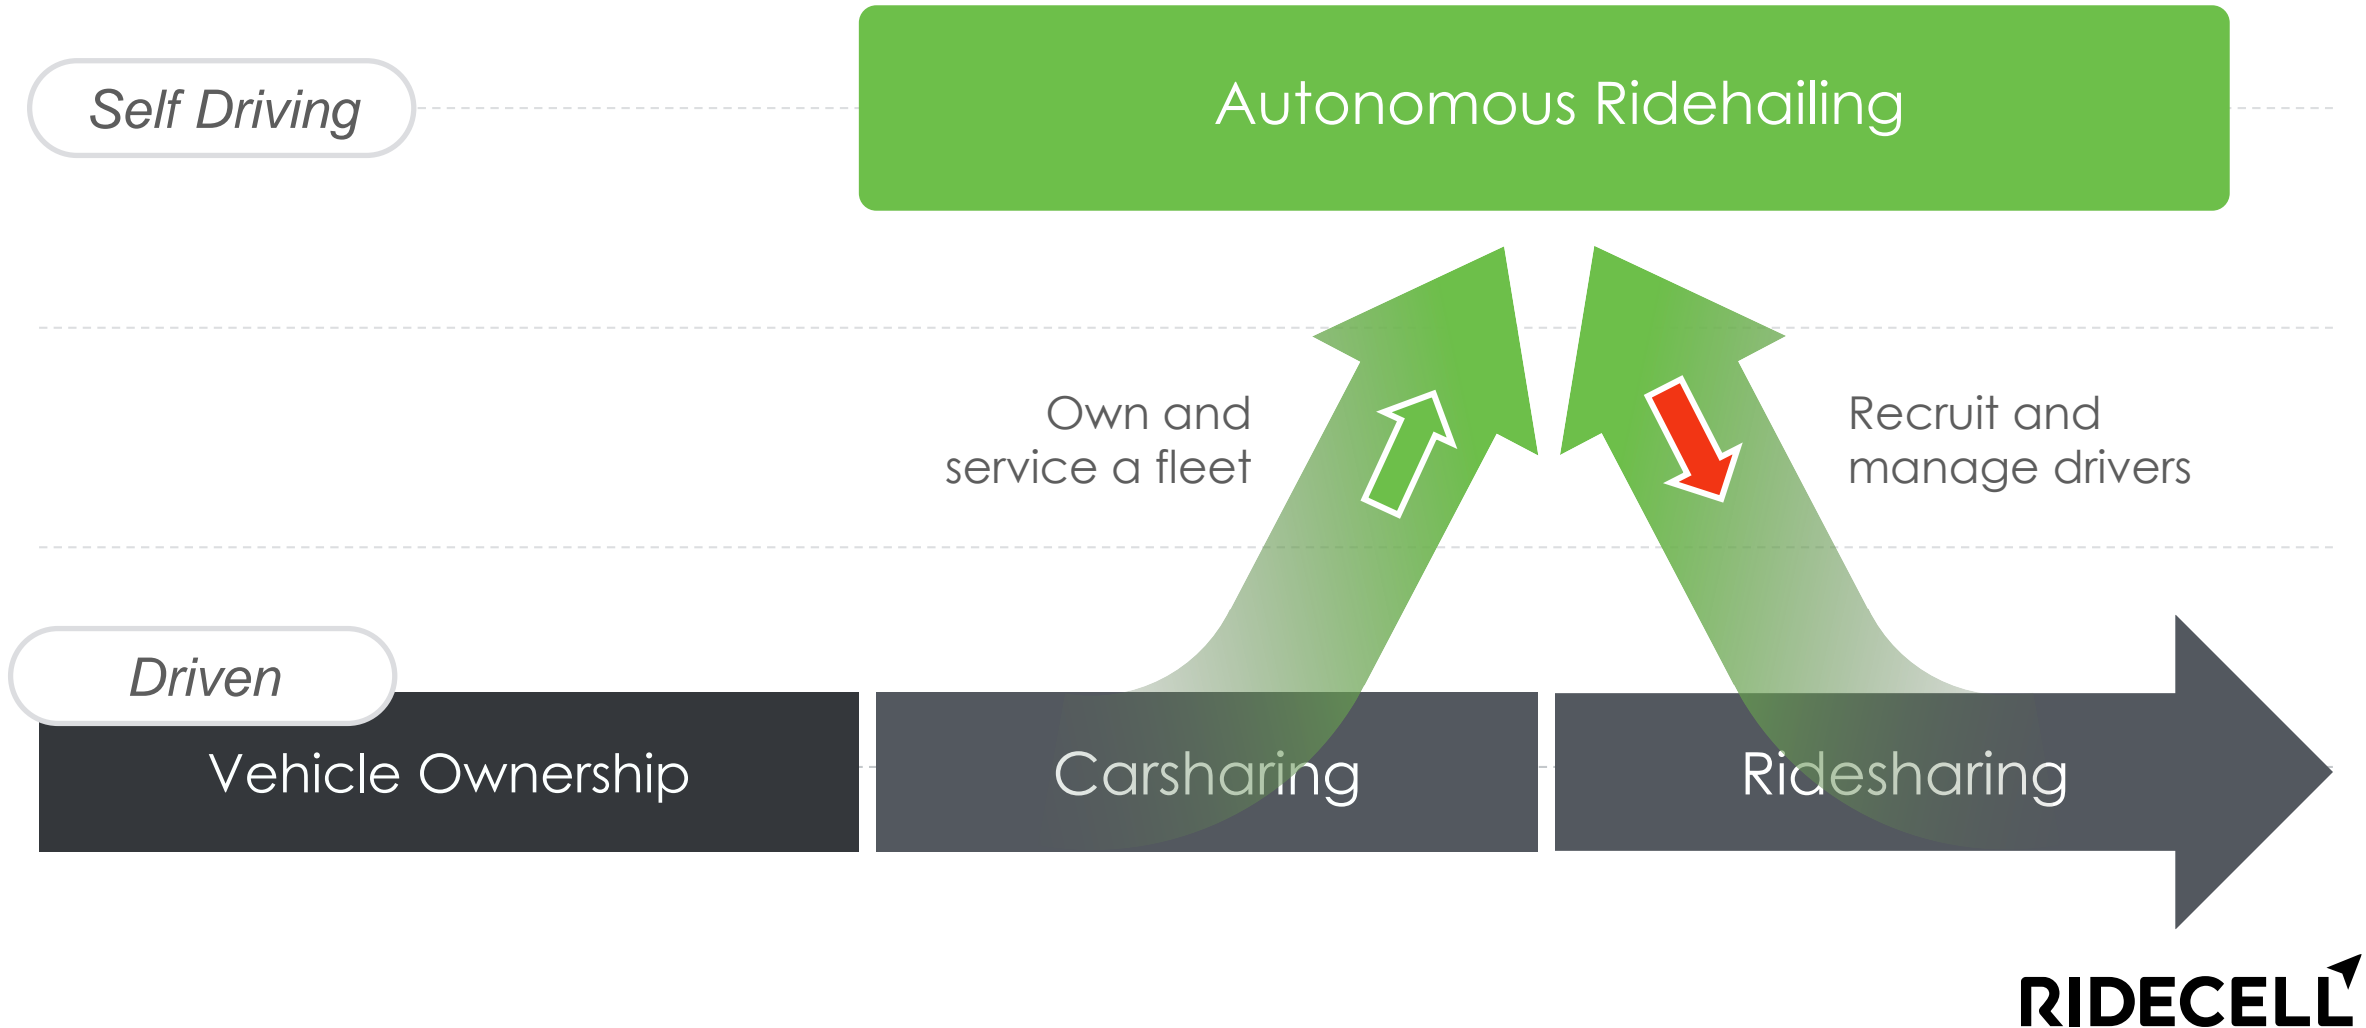

Mobility service providers gain value

(\$ Billions) Market cap mobility as a service vs. automotive manufacturers

Mobility as a service evolution

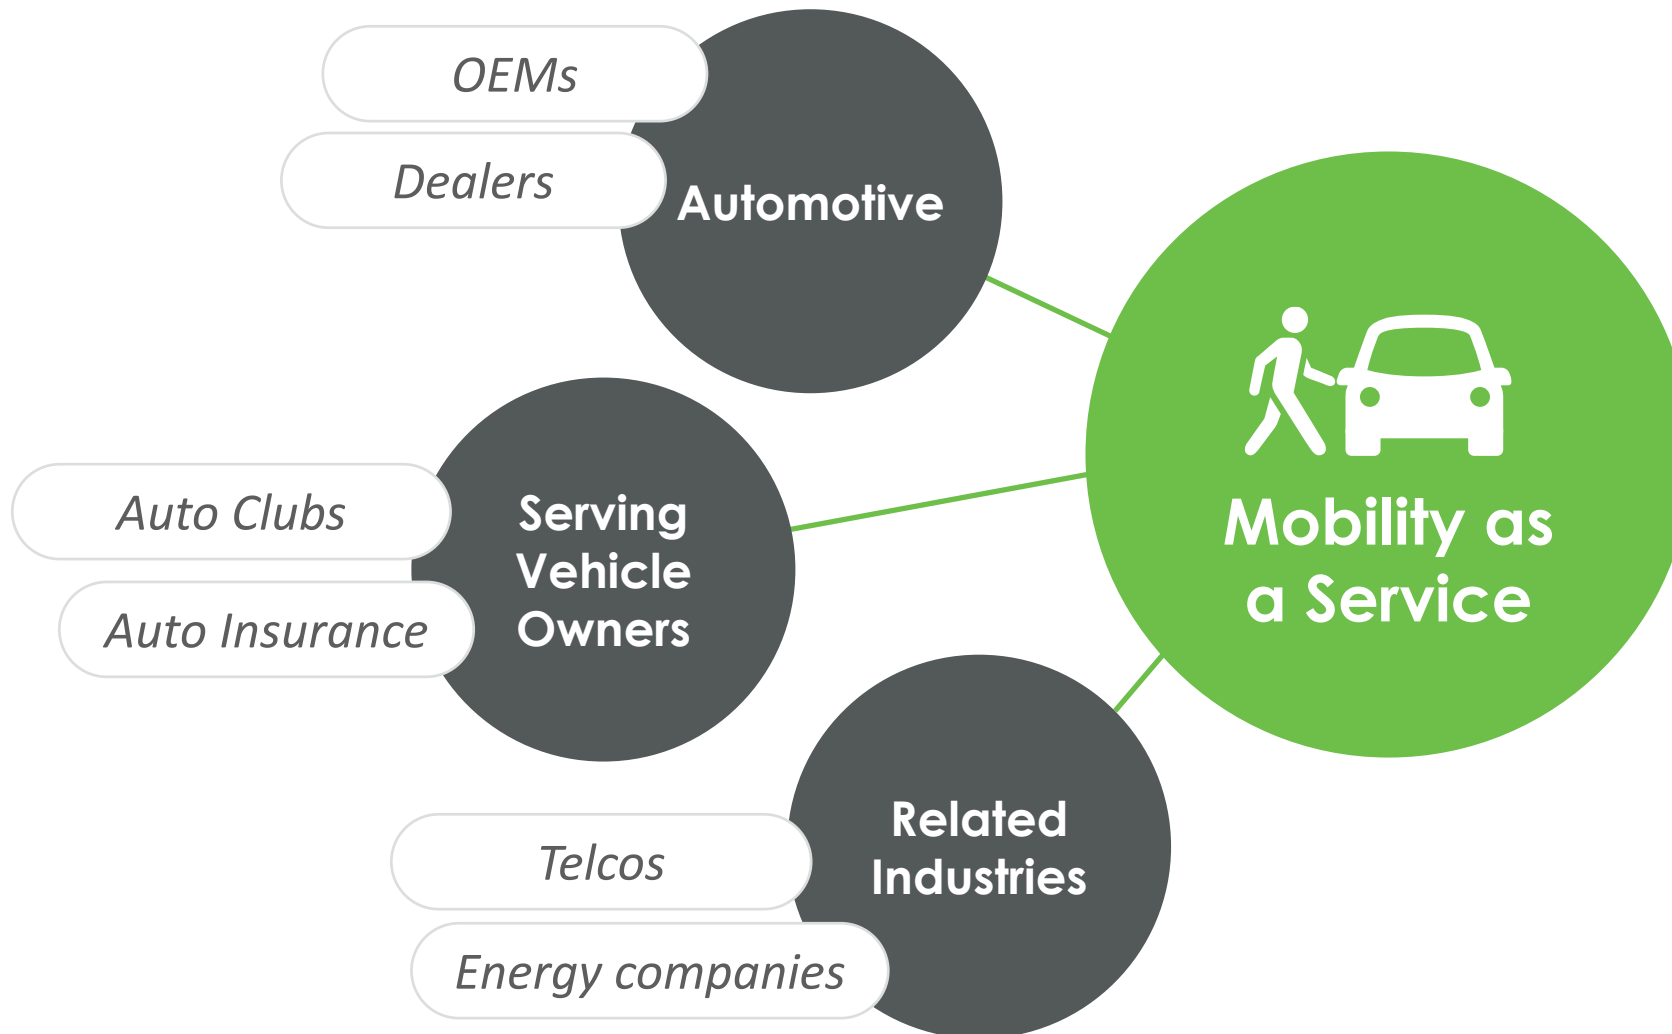

BMW and Daimler invest \$1 billion in their joint mobility services

Industries stepping up to new mobility...

...are those that lose when private vehicle ownership declines

Shared fleets are the first step.
Carsharing

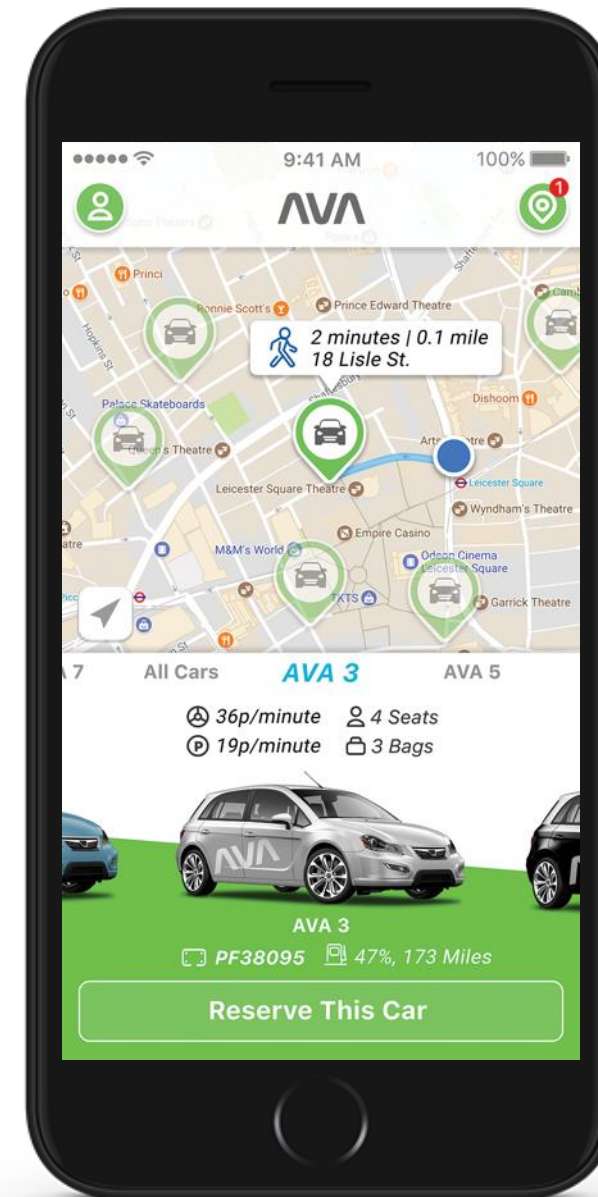

Shared

Critical Elements of New Mobility

The potential for multiple users a day

- Authenticate new drivers from their smartphone
- Press a button, car unlocks
- Leave the car, and digitally check for doors/windows open
- Includes insurance, gas, maintenance, cleaning

Overlying use cases increases the return on investment

(Aggregated , anonymized data)

Shared EV fleets is the next step.

EV Carsharing

Electric

Fleet Charging removes the barriers to wide adoption

Adding self driving to carsharing fleets

Autonomous Carsharing

L4 Autonomous

Near term use cases for autonomous driving

Low speed

Urban areas

**Level 4
autonomous**

**No
passengers**

Late Night Fleet operations

- Fleet repositioning to high demand areas
- Movement to charging stations
- Schedule maintenance depot run

Car Hailing – pre ridehailing permit

- Eliminate walking to cars
- Delivery to driver
- Driver drives vehicle to destination
- Vehicle parks itself
- Daytime use cases – make this harder to achieve

RIDECELL

Company

- Company founded in 2009 with focus on new mobility
- Over 25M rides/rentals delivered
- HQ in San Francisco with offices in Europe and India
- Have raised over \$40 Million in funding

Customers

Plus over 15 other carsharing/ridehailing customers
